

BUGWOOD Wiki

wiki.bugwood.org

A content management system providing a source of reliable information on agriculture, forestry and invasive species for homeowners, educators, industry professionals, and researchers

BugwoodWiki features “closed” authorship where all information in the Wiki is prepared by scholars and professionals in each of the content areas. It provides the ability to centrally consolidate information and promote collaborative writing. Like BugwoodImages, all of the content in the BugwoodWiki may be used in non-profit publications as long as the proper credit is given.

Search for information on...

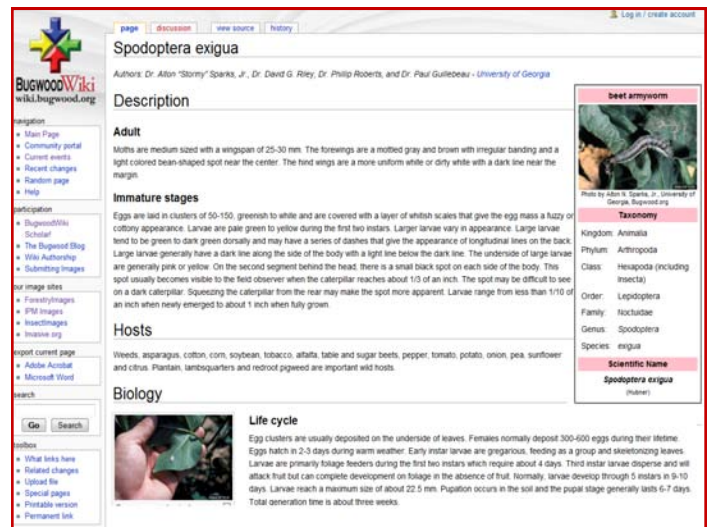

- Invasive Species
- NPDN First Detector Training Materials
- Crop Management
- Agronomic Crops
- High Plains IPM
- Diagnostician’s Cookbook
- Forestry & Forest Health
- And MORE!!

D. Edwards, Bugwood.org

K. D. Arvin, Bugwood.org

BugwoodWiki page on the species *Spodoptera exigua*

BugwoodWiki is fully integrated with the 117,000 images currently available through BugwoodImages. Using this integration users can easily access and use:

- Images with the proper citation
- Taxonomy information boxes
- Expert and user selected galleries of images for a species
